· 8.2 Exposure controls

- · Personal protective equipment:
- General protective and hygienic measures: Avoid close or long term contact with the skin. Do not eat, drink, smoke or sniff while working. Be sure to clean skin thoroughly after work and before breaks.
- · Respiratory protection: Not required.

• Protection of hands:

Preventive skin protection by use of skin-protecting agents is recommended.

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

· Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

· Penetration time of glove material

The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed.

- · Not suitable are gloves made of the following materials: Leather gloves
- · Eye protection: Goggles recommended during refilling
