

Accelerate Antifreeze GW 13 (Concentrate)

Description/Application

Accelerate Antifreeze GW 13 (Concentrate) is a modern antifreeze based on ethylenglycole, to be used for for motor vehicles with engines of cast iron, aluminum and/or from the combination of both metals.

Accelerate Antifreeze GW 13 (Concentrate) is particularly recommended for light metal engines where a special aluminum protection is required at higher temperatures.

Accelerate Antifreeze GW-13 (Concentrate)

- provides long lasting protection due to the combination of the organic inhibitors
- forms a homogeneous protective layer due to the sophisticated additive package
- offers thanks to highly effective additives to protect all metals, including aluminum
- is environmentally friendly, being free of nitrite, amine, phosphate and borate.

Specification/Recommendation

- Audi / Seat / Skoda / VW - TL774J (G13)

Accelerate Antifreeze GW 13 (Concentrate)	unit	value
Density at 20°C	kg/m ³	1140
Colour		red / violett
Flash Point	°C	>100
pH (33%)		8,4
Boiling Point	°C	>170
